

Application No. 09/449,001

Filed: November 24, 1999

TC Art Unit: 2685

Confirmation No.: 5697

AMENDMENT TO THE CLAIMS

1. (Currently Amended) A system for allowing a subscriber to a prepaid communication service to roam between different service markets, the system comprising:

a serving mobile switching center of a respective serving market capable of communicating with ~~the~~ a roaming subscriber's phone unit and capable of generating a request for a profile associated with the subscriber,

a location register in communication with the serving mobile switching center and in communication with a home location register associated with the subscriber profile, the location register being capable of: collecting the requested subscriber profile, determining whether a prepaid platform is associated with a the respective market for of the serving mobile switching center, and selectively modifying the requested and collected subscriber profile based on whether a prepaid platform is associated with the respective market for of the serving mobile switching center, and

a prepaid platform capable of performing call processing for a call associated with the subscriber,

where the selective modification of the requested and collected subscriber profile by the location register is for enabling the serving mobile switching center to employ the prepaid platform associated with the respective market and thereby to enable the provision of prepaid services to the roaming subscriber.

Application No. 09/449,001

Filed: November 24, 1999

TC Art Unit: 2685

Confirmation No.: 5697

2. (Currently Amended) A system according to claim 1, wherein the location register includes a database having information representative of ~~prepaid platforms associated with a plurality of~~ markets, capable of servicing serving the subscriber, having a prepaid platform associated therewith.

3. (Currently Amended) A system according to claim 1, wherein the location register includes a ~~messaging message~~ processing unit for processing a message from the serving mobile switching center to ~~identify for identifying~~ whether a prepaid platform is associated with the respective market for of the serving mobile switching center.

4. (Currently Amended) A system according to claim 1, wherein the serving mobile switching center includes a profile request service capable of requesting a ~~user subscriber~~ profile in response to receipt of an NPA/NXX signal representative of the subscriber being a prepaid customer.

5. (Original) A system according to claim 1, wherein the location register includes a memory space for storing information representative of a location associated with the subscriber.

6. (Original) A system according to claim 1, wherein the location register includes means for providing a home location register with information representative of a location associated with the subscriber.

Application No. 09/449,001

Filed: November 24, 1999

TC Art Unit: 2685

Confirmation No.: 5697

7. (Currently Amended) A system according to claim 1, wherein the location register includes means for passing through registration requests for subscribers identified as ~~net-prepaid~~ non-prepaid subscribers.

8. (Original) A system according to claim 1, wherein the location register includes means for requesting subscriber location information from a home location register associated with the subscriber.

9. (Original) A system according to claim 1, wherein the location register is in communication with the prepaid platform for delivering subscriber location information to the prepaid platform.

10. (Original) A system according to claim 1, wherein the location register includes means for communicating with a visitor location register to allow call termination for a call.

11. (Previously Presented) A system according to claim 1, wherein the location register includes an error reporter for reporting detected error conditions to the prepaid platform.

12. (Currently Amended) A system for processing calls from a subscriber, the system comprising:

a mobile switching center capable of communicating with a subscriber phone unit and requesting a subscriber profile,

a location register capable of: accessing the requested subscriber profile, determining whether a prepaid platform is

associated with ~~a~~ the respective market ~~for~~ of the mobile switching center, selectively modifying the requested and accessed subscriber profile based on whether a prepaid platform is associated with the respective market of the mobile switching center requesting the subscriber profile, and providing the modified subscriber profile to the requesting mobile switching center, and

a prepaid platform capable of: communicating with the requesting mobile switching center and performing call processing for a subscriber call,

where the selective modification of the requested and accessed subscriber profile by the location register is for enabling the mobile switching center to employ the prepaid platform associated with the respective market and thereby to enable the provision of prepaid services to the subscriber.

13. (Currently Amended) A system according to claim 12, wherein the location register includes a database having information representative of ~~prepaid platforms associated with a~~ plurality of markets, capable of ~~servicing~~ serving the subscriber, having a prepaid platform associated therewith.

14. (Currently Amended) A system according to claim 12, wherein the location register includes a ~~messaging~~ message processing unit for processing a message from the mobile switching center ~~to~~ identify for identifying whether a prepaid platform is associated with the respective market ~~for~~ of the mobile switching center.

21. (Currently Amended) A method for processing calls from a subscriber, the method comprising:

~~determining whether a prepaid platform is associated with a~~
respective market for a serving mobile switching center has a
prepaid platform associated therewith, wherein the serving mobile
switching center receives a call associated with the subscriber;
and,

based on whether a prepaid platform is associated with the
respective market, selectively modifying a profile associated with
the subscriber to route the call to at least one of a prepaid
platform located in the respective market for the serving mobile
switching center and a prepaid platform located in a market
different than the respective market for the serving mobile
switching center,

where the selective modification of the subscriber profile is
for enabling the serving mobile switching center to employ the
prepaid platform if the prepaid platform is associated with the
respective market and thereby to enable the provision of prepaid
services to the subscriber.

22. (Previously Presented) The method of claim 21, wherein the call originates from at least one of a mobile telephone and a landline.

23. (Canceled)

24. (Currently Amended) The method of claim 21, wherein modifying the profile associated with the subscriber comprises:

Application No. 09/449,001

Filed: November 24, 1999

TC Art Unit: 2685

Confirmation No.: 5697

modifying the profile associated with the subscriber to route the call to a prepaid platform located in the respective market for the serving mobile switching center for the serving mobile switching center to complete the call.

25. (Previously Presented) The method of claim 21, wherein modifying the profile associated with the subscriber comprises:

modifying the profile associated with the subscriber to route the call to a hotline number.

26. (Currently Amended) The method of claim 21, wherein modifying the profile associated with the subscriber comprises:

modifying the profile associated with the subscriber to include a hotline number for a prepaid platform located in a market different than the respective market for the serving mobile switching center.

27. (Previously Presented) The method of claim 26, wherein the hotline number comprises a toll free telephone number on a public switched telephone network.

28. (Currently Amended) A method for processing calls for a subscriber, the method comprising:

receiving a request for a profile associated with the subscriber, ~~wherein the subscriber makes~~ making a call in a roaming market;

determining whether a prepaid platform is associated with the respective roaming market; and,

Application No. 09/449,001
Filed: November 24, 1999

based on whether a prepaid platform is associated with the respective roaming market, modifying the profile associated with the subscriber whereby ~~to route~~ the call is selectively routed to a prepaid platform located in the respective roaming market or to a prepaid platform located in a market different than the respective roaming market.

29. (Canceled)

30. (Currently Amended) The method of claim 28, wherein modifying the profile associated with the subscriber comprises:

modifying the profile associated with the subscriber to route the call to a prepaid platform located in the respective roaming market for a mobile switching center in the respective roaming market to complete the call.

31. (Previously Presented) The method of claim 28, wherein modifying the profile associated with the subscriber comprises:

modifying the profile associated with the subscriber to route the call to a hotline number.

32. (Currently Amended) The method of claim 28, wherein modifying the profile associated with the subscriber comprises:

modifying the profile associated with the subscriber to include a hotline number for a prepaid platform located in a market different than the respective roaming market.

33. (Currently Amended) A method for processing calls from a subscriber, the method comprising:
